

## Project Description

### The project goal

The project's primary goal is to create an application that allows users to send only new content to their friends and acquaintances: pictures, music, and videos.

### Key project features

<i>Ability to set up and maintain the addressee list.</i>	It will allow users to send content to people with whom they are communicating at the moment.
<i>Ability to set up and maintain the content type list.</i>	It will allow users to set the content source dynamically, sort, and search reposts by the content type and its parameters.
<i>Ability to send and store content to people and be warned immediately in case of a repeat.</i>	It will allow users to avoid resending the same repost to the same person.
<i>Ability to track reposts and tag their content.</i>	It will allow users to group repost content and view it.
<i>Ability to view reposts' content in the application.</i>	It will allow users to check reposts right in the application without going to other sites.
<i>Ability to search and sort reposts by the content type, properties and tags.</i>	It will allow users to search content flexibly.
